GMT · EUROPE-ALIGNED · REMOTE

Odoo Tech Lead at **Progistack**, an Odoo integrator. Joined as a Python developer, promoted to Tech Lead in **12 months** leading a team of five. I run implementations end to end — scoping, configuration, custom development, migration, training, go-live — for manufacturers and distributors. Eleven implementations delivered in two years, with go-lives scheduled outside operating hours. I work on both sides of an Odoo project: **the business analysis with the client's management, and the code that makes it real.**

11 OD00 PROJECTS DELIVERED · 5 DEVELOPERS MANAGED · ~45 USERS TRAINED · OD00 17 · 18 · 19
FOOD PROCESSING · GROCERY RETAIL · COFFEE & COCOA · SEAFOOD · PALM OIL · TRADE & SERVICES

Consulting	Requirements analysis Gap analysis Functional specifications UAT Training Change management Go-live & support Agile
Development	Python Django Node.js TypeScript React Vue Next.js React Native Flutter Claude Code
Data & infra	PostgreSQL MongoDB Docker CI/CD Git Cloud
Leadership	Team of 5 developers Code review Architecture Estimation Client relationship

EXPERIENCE

Odoo Tech Lead & ERP Consultant

01.2025 → present

Progistack — *Odoo integrator*

- Leads a team of **5 developers**: technical architecture, systematic code review, task allocation, estimation and skills development.
- Runs implementations end to end, from scoping with the client's management through to go-live and support.
- Direct technical counterpart for clients: turning business needs into Odoo solutions, estimating, and arbitrating between configuration and custom development.
- Builds the custom modules (Python, ORM, QWeb, OWL) and leads version migrations from Odoo 17 to 19, **switchovers scheduled outside operating hours**.
- Connects Odoo to third-party software and industrial equipment over APIs, including proprietary systems with no existing connector.
- Trains client teams with my team — **around 45 users** supported — and drives change management through to real ERP adoption.

Python / Odoo Developer

01.2024 → 12.2024

Progistack — *joined as an intern, promoted to Tech Lead in 12 months*

- Custom module development and functional configuration on client projects across a range of industries.
- Involved in requirements gathering, acceptance testing and user training.

Web developer — freelance

08.2023 → 10.2023

BabyLinkUp

- Presentation landing page with an online ticketing system integrated.

Web developer & graphic designer

03.2022 → 05.2023

Génius Communication

- Designed and built **Lesouk.ci**, a classified-ads marketplace, from mockup to production.
- Full online store: catalogue, cart, checkout.
- Visual identity and communication materials for business clients.

Web development intern

07.2021 → 10.2021

AlloDocteurPc

- Maintenance page, design included, and advertising materials.

ODOO IMPLEMENTATION PROJECTS

Des Gâteaux et du Pain

BAKERY & PASTRY · 62 CUSTOM MODULES · 15 USERS

Four kitchens, five shops: production tracked **without the manufacturing module**, in-house bills of materials imported from Excel and QR-coded transfer slips.

Groupe Kaderim — Coco Market

GROCERY RETAIL · 27 CUSTOM MODULES · 20 USERS

About ten companies, as many shops. **Automatic inter-company stock transfers**, replenishment from the central warehouse, POS and e-wallet.

Saff Palm

PALM OIL · 12 CUSTOM MODULES · 11 USERS

From the truckload of seeds to the litre of oil sold. **Weighing read off the weighbridge by an ODBC agent**, digitised shift logbook and extraction rate computed daily.

Sutec / Café Continent

COFFEE & COCOA · 19 CUSTOM MODULES · 18 USERS

Cocoa intake, quality control, processing and export on a single multi-company instance. **FNE tax certification** and Power BI analytics wired straight into the ERP.

Kapitaine Group

SEAF00D · 5 CUSTOM MODULES · 9 USERS

Selling by the kilo a product stocked by the piece: **dual unit-of-measure POS**, live stock visibility and invoicing on goods despatch.

SECII

VERSION MIGRATION · 22 → 30 MODULES · 14 USERS

Full port of the custom estate: **105 view syntaxes dropped by Odoo brought back to zero**, JS widget rebuilt, and SQL rescue of a business role and its permissions.

Other implementations delivered: AGS (Africa Group Services), Electromatic, Copa Delio, Gedispa, Africa-Food. Technical contributions: Phenicia, Simam, Sivop.

EDUCATION

Bachelor’s degree — MIAGE

2018 → 2022

Université Polytechnique de Bingerville

Computer methods applied to business management

Baccalauréat, science stream

2018

Lycée Classique d’Abidjan
